THERMAL INSULATION TECHNOLOGY

- ✓ VERY ATTRACTIVE R.O.I.
- ✓ LOW capital investment
- ✓ LOW labour force required
- ✓ LIMITED production area
- ✓ Break-even point in SHORT TIME

A full range of EPS based products for construction can be produced with our technology. The following are an example.

POLITERM BLU

Superlight aggregate for the preparation of lightweight and thermal insulating mortars for roofs, screeds, levelling and as a substrate for floor heating.

ISOLCAP RANGE

Ready mix lightweight thermal insulating mortars for roofs, screeds and as a substrate for floor heating. Available with different formulas and densities.

ECAP

Pre-finished EPS boards for the external wall and ceiling insulation. Save up to 60% in timing and labor cost !

ISOLTECO/PROTHERM LIGHT/ISOLSAN

Full range of ready mix plasters with high thermal insulating power. Also available with a formula for fire protection (REI 180) and a formula designed for refurbishment of old buildings.

POLITERM CONCRETE BRICKS AND PREFABRICATED ELEMENTS

Edilteco Group in Italy, in Europe & worldwide.

The today's result after more than 30 years of research and innovation is the creation of quality products, manufactured by production lines highly automatized, that the Edilteco Group has studied, designed and realized on purpose.

Nowadays Edilteco owns the most important and modern production line of ready mix products for the preparation of mortars and thermal insulating plasters. Edilteco is present with production units and a sales net in over 40 countries in the world and is developing new sinergies

every day. Strong with its technological and applicative Know-How, Edilteco cooperates with companies from all over the world, supplying know-how, special components and technical as well as marketing assistance.

The Edilteco production is, hence, distributed or manufactured under license from industrial partners in many countries of Europe, America, Asia and Africa.
